Company Overview

Headquartered in Traverse City, MI, Century, Inc. is a privately held company that focuses on high quality, vertically-integrated precision manufacturing. The company is comprised of two separate business units on our 13 acre campus: Precision Machining & Welding and World Class Heat Treating.

SINGLE SOURCE FOR MACHINING, WELDING, & HEAT TREATING

This unique vertical integration of our AS9100 precision machining operation, certified welding, and world class AS9100-NADCAP heat treat facility allows for the exchange of operational resources, single source accountability, and ultimately value to our customers.

Century’s products typically consist of complex, high precision, machined metal components. As a precision machining company, Century welcomes all manufacturing challenges. We take pride in engaging those challenges and making them reality. We have provided many solutions to a broad spectrum of markets. Our industry expertise and talented workforce, allow our customers to experience endless possibilities.
